INSPIRATION GUIDE | Exterior Fiberglass & Steel Door Systems

ALLIANCE
DOOR PRODUCTS

Why Alliance Door Products

Let us guide you through our exterior Fiberglass and Steel door offerings with a curated selection of the most popular Therma-Tru door systems, glass, hardware, finishes, and accessories. With branches strategically located throughout Canada, many items are available for quick delivery through our STOCK or RAPID SHIP programs.

Please note that regional variations in product availability may apply. For specific details, please contact your local Alliance Door Products branch.

- Serving the DOOR INDUSTRY since 1978.
- Staffed by friendly, knowledgeable door EXPERTS.
- Complete local service solutions including custom machining capabilities and prehanging.
- Carefully chosen, comprehensive INVENTORY and access to great RAPID SHIP options.
- Great package opportunities: Interior Doors, Millwork, Stair Parts and more.
- Door Hardware.
- Pre-finish Stain and Paint program.
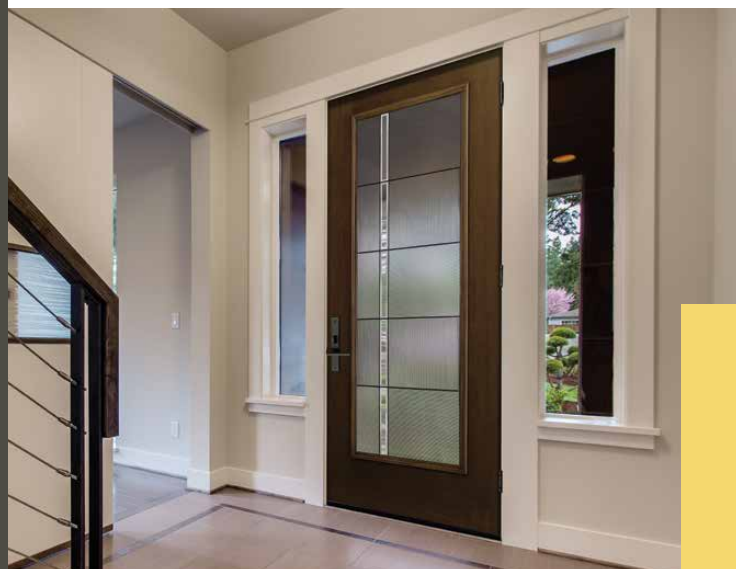

Year after year, building professionals consistently rank Therma-Tru as their top exterior door system choice. With over 50 years of experience and technical expertise, Therma-Tru built a reputation for delivering exceptional quality and performance.

As pioneers of fiberglass doors, Therma-Tru revolutionized the industry and continues to set the standard with innovative door systems designed to meet the highest expectations.

Discover the difference that makes Therma-Tru the trusted name in entry doors.

Why Therma-Tru₍®₎ Fiberglass Doors

Your Therma-Tru fiberglass door system delivers long-lasting beauty, durability and energy efficiency.

Beautiful
- Offers endless choices in door styles and handcrafted decorative glass designs.
- Gives the authentic look and feel of real wood.

Low-Maintenance
- Built from a material that won't dent or rust, nor will it warp, split, crack or rot.
- Requires less work than wood or steel to keep your door looking "new" longer.*

Energy-Efficient
- Solid polyurethane foam core provides up to four times the insulating R-Value of wood.**
- Most decorative, privacy and textured glass features triple-pane construction for reduced outside noise and increased energy efficiency.

Durable
- Provides homes with weather resistance, as well as long-lasting curb appeal.
- Engineered to work together as a complete door system for uncompromising quality, inside and out.

LIFETIME
L I M I T E D

Doors That Inspire

Design Inspiration and Architectural Styles

In today's evolving home design landscape, the boundaries between modern, casual, and traditional styles are increasingly fluid, with each style borrowing elements from the others. Modern Farmhouse and European styles further blur the lines.

As homeowners seek to express their unique tastes, decorative accents play a pivotal role in defining the overall aesthetic. A growing trend is the incorporation of nature inspired details and minimalist influences, reflecting a desire for simplicity and connection to the natural world.

Another significant trend is the seamless blending of indoor and outdoor spaces, as the concept of "home" extends beyond the confines of four walls. Exterior doors are becoming more than just entry points; they are key elements that bridge personal outdoor retreats with secure and comforting indoor environments. This merging of spaces highlights the importance of an inviting and cohesive entryway that sets the tone for the entire home.

Modern

Focuses on clean lines and asymmetrical exteriors. Fuses together industrial concrete, vinyl and glass materials.
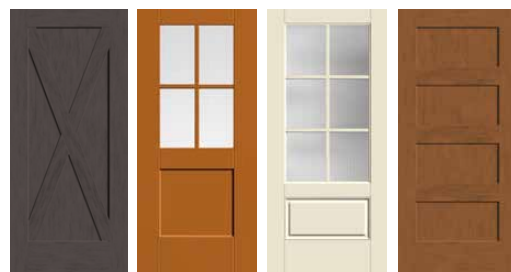

- Flat or Shed Roof Lines
- Geometric or Angular Shapes
- Expansive Windows
- Minimal Decoration

Farmhouse

Clean, simple and welcoming, taking classic rustic farmhouse elements and combining them with the sleek and simple twist of modern décor.

- Gable roof Lines
- Dark Trim
- Clean lines
- Rustic Decoration
- Shaker paneling

European

Inspired by the provincial style of countryside estates. Features rich details on brick, stone and stucco exteriors.

- Multi-Peaked Roof Lines
- Shingles or Clay Roof Tiles
- Romantic Decoration
- Arched Windows and Entryways
- Grand Entrances

Large Daylight Openings

Whether it's a dramatic entrance or continuous indoor-outdoor living, wide openings are a growing design trend for both entry and patio systems. The use of glass, sidelites, or multiple units on a continuous visual plane provides abundant natural light, spacious openings.

Classic Craft® Collection

LIFETIME LIMITED WARRANTY
TRANSFERABLE

An unrivaled entry experience.

Transform the entry into a one-of-a-kind experience. One that blends artistry, craftsmanship and modern engineering. Premium construction, inside and out.

Highlighting the best of craftsmanship and innovation, Classic Craft premium entryways boast impressive, well-designed features and remarkable construction.

The inner workings of each Classic Craft door lay the foundation for exceptional strength, security, energy efficiency and long-term performance you can depend on for years to come.

*Comparison of Classic Craft to other standard fiberglass doors with similar styles.

Visit www.thermatru.ca for details.

**Comparison of R-Values of fiberglass to wood doors (both without glass).

Engineered for Moisture Protection
Features composite top and bottom rails and solid hardwood edges for increased moisture and rot protection all the way around the door.

Designed with Authenticity
Features construction identical to wood doors with narrow stiles and rails and flush-glazed glass options that are more than 10% wider* to welcome more natural light into the home.

Tested to Withstand Mother Nature
Designed and rigorously tested to withstand and protect from the damaging effects of harsh weather conditions.

Therma-Tru Door Frame
Created specifically for Therma-Tru doors to deliver an entire entry system designed and engineered to work together to resist leaks and drafts and help maintain energy efficiency and weather resistance.

Designed for Long-Term Performance
Features fiberglass skins that are 46% thicker* for added durability and better long-term performance.

Triple-Pane Construction
Most decorative, privacy and textured glass panels are enclosed between tempered glassed, offering superior quality and thermal performance.

Crafted for a True-to-Wood Appearance
Revolutionary AccuGrain technology replicates authentic natural wood textures for a look and feel that is visually indistinguishable from real wood.

Built for Strength and Security
Constructed with a 4" wide board of engineered lumber that runs the full length of the locking side of the door for a solid natural wood feel that makes Classic Craft doors 50% stronger and 30% heavier*

Constructed for Energy Efficiency
Built with a high-performance polyurethane foam core that is four times more energy efficient than wood.**

Door & Glass

Door Construction

Fiber-Classic® and Smooth-Star® doors set the standard for beauty, quality and performance at an excellent value. Explore the craftsmanship and innovation of doors designed for long-lasting energy efficiency, durability and security.

❶ Weather Resistance

Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.

❷ Security

Our fiberglass door slabs are up to 30% more resistant to kick-ins than standard steel doors.* Our Fiber-Classic and Smooth-Star doors feature an enhanced lock block combined with a 1-¼" engineered lumber lock stile which increases rigidity and stability.

❸ Durability

With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.

❹ R-Values

Built with a polyurethane foam core that offers up to four times the insulating R-Value of wood**, Therma-Tru® fiberglass doors insulate against cold and heat for exceptional energy efficiency.

*Comparison of pendulum impact test results for Therma-Tru doors in steel versus fiberglass. Visit www.thermatru.ca for details.
**Comparison of fiberglass to wood doors (both without glass).

Optional Dentil Shelves

Available for Craftsman-style doors.

Smooth-Star 4-Block*

*Not recommended for use behind storm doors or to be painted dark colours, if exposed to direct sunlight.

Note: Finish colours may vary from an actual application due to fluctuations in finishing or printing. Product images show exterior side of door. Glass privacy ratings may be more or less than indicated, based on glass design and size of glass. Glass designs may differ from depiction due to size and hand craftsmanship of glass. See your Therma-Tru seller or visit www.thermatru.ca for details on glass privacy ratings and glass designs.

Low-E Glass

More energy efficient than traditional clear glass, Low-E glass is available as an option.

In cold weather, Low-E glass reduces the loss of heat by reflecting the heat back inside the home.

In warm weather, Low-E glass reflects the sun's rays off of the glass, keeping the interior of the home cool.

Garden & Reno Garden Door System

Performance. Beauty. Security.

Extend your living space with this high performance energy efficient Patio Door System. Assembled in Canada, these out-swing crank-out mulled pairs are a robust, prehung package for high traffic entries. The Reno Garden Door System is ideally suited to replace outdated sliding vinyl or aluminum patio doors.

- **1-3/4" Therma-Tru® Smooth-Star® Flush-Glazed Slabs**
  One side cranks open like a casement window for ventilation, the other side is an out-swing entry door.
- **Energy Efficient** with surround weatherstripping.
- **Deep "Fatboy" Style Plant-in Mull Post**
  Delivers structural integrity & seal against elements.
- **4-9/16" & 6-9/16" Jambs with Primed Pine Frames**

- **HD TRUTH Vent Roto Operator**
- **TRUTH Encore Folding Crank Handle**
  Smooth & reliable; sleek look.
- **Rugged, HD Interior Screen** - Removable
- **3 - 4" x 4" BB hinges**
- **10-Year Limited Slab Warranty**

Combo Door

Affordable, secure, energy efficient and durable.

Fabricated in Canada to be reliably tough and capable of standing up to our demanding winters!

This rugged, pre-hung package includes:

- 1-3/4" Fiberglass or Steel Insulated 6-Panel Inner Entry Door.
  Paired with a matching storm door.
- 1-3/4" Fiberglass or Steel Insulated Vented Outer Storm Door.
  Proven durability, insulative value and security. Primed and ready to paint. Simple screened ventilation.
- Frames screwed for exceptional strength.
- 4-9/16", 6-9/16", 7-1/4", and 8'0" Double Rabbeted Jambs, custom jamb sizes also available. Both doors are hung on door jamb for superior strength and screw holding.
- Wrap-around Security Strike Plate.
  Effective break-in deterrent adds durability to the entire assembly.
- 10-Year Limited Slab Warranty.

Alliance Door Systems

Our complete door systems feature doors, glass and components engineered to work together to resist leaks and drafts, and help maintain energy efficiency and weather resistance.

❶ **Sill and bottom sweep** form a tight seal against wind-driven moisture infiltration.

❷ **Corner seal pads** complete the seal between the sill cap, bottom sweep and weatherstrip.

❸ **Hinges** position the door to properly compress the weatherstrip.

❹ **Weatherstrip** is specifically engineered to provide the best possible fit with our door systems.

❺ **Multi-point locking system** (recommended) engages the door and frame at three points from top to bottom for enhanced security while helping to preserve the seal of the weatherstrip even under wind pressure.

❻ **Lip-lite frame** features a compression seal against weather. **Flush-glazed glass** is built directly into the door without a lip-lite frame, featuring a high-performance adhesive weather seal inside and out.

1

Weatherstrip / Composite Door Frame / Air & Moisture
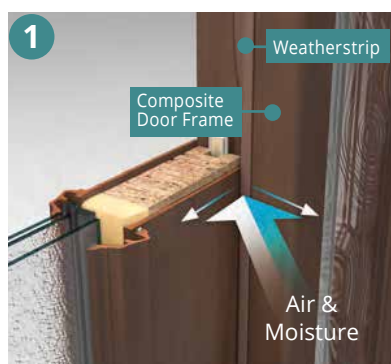

Weatherstrip is engineered in a variety of profiles to provide the best possible fit with our door systems, helping to deliver a precise seal between the **door** and **frame**. In addition, a rot-free Therma-Tru **composite door frame*** delivers extra protection from the damaging effects of moisture.

2

Air & Moisture / Bottom Sweep / Sill / Sill Pan

**Sill** and **bottom sweep** form a tight seal against wind-driven moisture infiltration at the bottom of the door system and help channel moisture away from the home. **Sill pan** (recommended) adds an extra layer of protection to help keep moisture away from the subfloor.

3

Weatherstrip / Corner Seal Pad / Bottom Sweep / Sill Cap / Air & Moisture / Sill

Corner seal pads (inswing only) complete the seal between the **sill cap, bottom sweep** and **weatherstrip** to help block potential pathways where wind-driven moisture can infiltrate the bottom corner of the door system.

4

Hinge / Weatherstrip / Air & Moisture
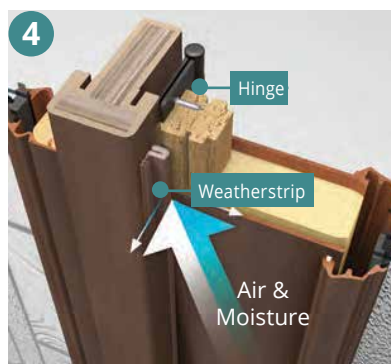

Hinges position the door to properly compress the **weatherstrip** to help form a tight, even seal against air and moisture infiltration when the door closes.
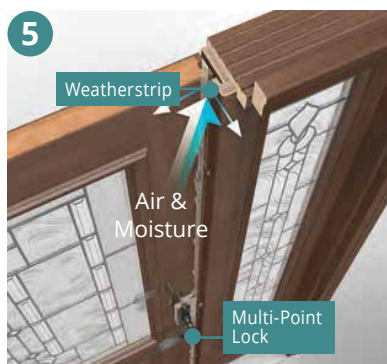

5

Weatherstrip / Air & Moisture / Multi-Point Lock

Multi-point locking system (recommended) engages the door and frame at three points from top to bottom for enhanced security while helping to preserve the seal of the weatherstrip even under wind pressure.

6

Adhesive Seal / Compression Seal / Adhesive Seal / Air & Moisture
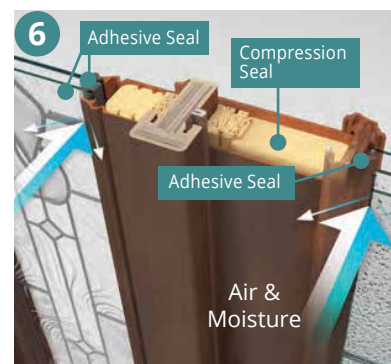

Lip-lite frame (shown right) features a **compression seal** against weather on the outside of the door and an **adhesive seal** against weather on the outside of the **glass. Flush-glazed glass** (shown left) is built directly into the door without a Lip-lite frame, featuring a **high-performance adhesive weather seal** inside and out.

TRU·GUARD™
## COMPOSITE TECHNOLOGY

Composite Door Frame Components

Design and Functionality. The uncompromising quality you've come to expect from a Therma-Tru® door, now available with a Therma-Tru composite door frame. New composite door frame featuring Tru-Guard™ composite technology provides a rot-free solution engineered to work together with rot-resistant Therma-Tru doors and components.

Interior   Exterior

① **Brickmould (Exterior)**   ② **Jamb**   ③ **Mullions**   ④ **Cove Mould (Interior)**   ⑤ **Transom Sill (Exterior)**

Protection From the Elements

Resists Moisture & Humidity
Composite Door frames feature completely composite exteriors that resist humidity and moisture to help eliminate the risk of swelling and cracking.

Resists Mold & Rot
A composite door frame does not absorb or retain moisture helping to eliminate the risk of mold and rot.

Resists Insects
With no exposed wood, Therma-Tru® composite door frames help protect from wood-ingesting insects.

TRU◇GUARD™
COMPOSITE TECHNOLOGY

Tru-Advantages

Delivers extra protection from the damaging effects of moisture for peace of mind.

- Eliminates the risk of rot and wood-ingesting insects with a durable composite material that is virtually maintenance free.
- Rot-free door frame does not absorb moisture and resists mold, mildew and fungus.
- Jamb screw plugs hide unsightly screws, allowing jamb to be installed with screws through its thickest part for better aesthetics and long-term performance.

Jamb
Brickmould
Mullion
Ⓐ
LVL Core
Ⓑ
Composite-Capped Bottom
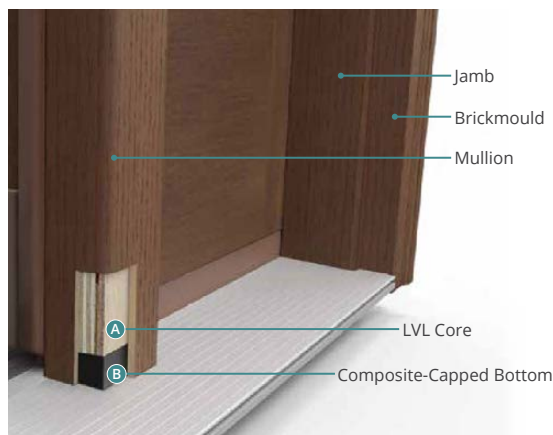

Available Textures

☑ ■ *Ready to finish.*

Buff Grained
- Features a universal wood grain to complement a wide range of grain species.
- Stain or paint to complement the entry – no sanding or priming required.

☑ ■ *Ready to install.*
■ *Ready to finish.*

White Smooth
- Features a matte finish similar to painted wood and includes a protective layer with UV inhibitors to help resist yellowing and fading.
- Ready to install as-is – no painting required. Or finish with stain or paint to complement the entry – no sanding or priming required.
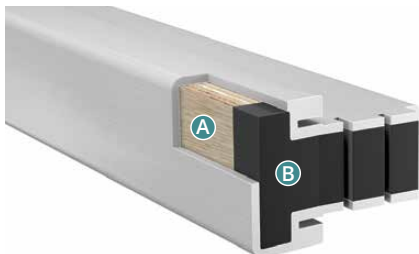

Reinforced Mullions

Provide additional structural support and stability. All mullions are reinforced with a co-extruded Ⓐ LVL core to provide additional structural support and stability and feature a Ⓑ composite-capped bottom to eliminate the risk of water absorption and maintain a rot-free composite exterior.
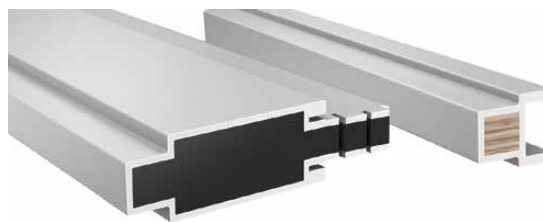

NEW Storm Door-Ready Mullion & Adapter

Innovative design helps simplify the storm door installation process.

- Storm door-ready mullion is available for common depths of 4-9/16" and 6-9/16".
- A storm door-ready mullion adapter is also available for unique depths up to 7-9/16".

Door Frame Options

Composite Frame & Brickmould

- **Closed Cellular Structure** ensures door frame & molding will not absorb or wick moisture
- **No warp, splinter or rot**
- **Twice the Screw-Holding Power** compared to traditional wood door frames
- **Easily Machined** just like wood frames

Extruded Metal Cladding

- **Premium Materials & Fabrication**
- 6-Gauge extruded aluminum
- Continuous head and sill mull system
- 13 color options
- No exposed fasteners
- **Versatile and Job Ready**
- 4-9/16" and 6-9/16" jamb depth
- 2-1/2" mull post, mull fits into header to eliminate mull twist
- Storm door compatible

Wood Frame Options

- Primed Wood
- Primed Finger-joint
- Fir
- Other wood frame materials

Stain & Paint Pre-Finish Program

Create a stunning entrance way.

For gorgeous pre-finished options consider our Alliance Door Systems color selections.

Door systems are expertly finished with high quality stains or paints creating the stunning entrance way your home deserves.

Stain Finishes
Regional availability. Please contact your local sales representative for Stain samples.

Paint Finishes
